

Ideation Phase

Empathize & Discover

Date	18 June 2026
Project Name	ShopEZ
Student Name	Akshara Cheedalla

Empathy Map Canvas:

Empathy Map Canvas is a user-centered design tool used to understand the needs, thoughts, behaviors, and challenges of customers. For the ShopEZ online shopping platform, it helps identify what users think and feel while shopping, what they hear from others, what they see on the platform, and how they interact with it. It also highlights users' pain points, such as payment security concerns and complicated checkout processes, along with their desired gains, including a seamless shopping experience, secure transactions, and fast delivery. This analysis enables the development of features that enhance user satisfaction and improve the overall shopping experience.

Example: ShopEZ – Online Shopping Platform
