

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	18 June 2026
Project Name	ShopEZ
Student Name	Akshara Cheedalla

Brainstorm & Idea Prioritization Template:

Brainstorming is an essential step in the development of the ShopEZ Online Shopping Platform, enabling the project team to identify user needs, explore innovative ideas, and design effective solutions for modern e-commerce challenges. It provides an open and collaborative environment where team members can freely share ideas related to product browsing, secure authentication, shopping cart management, order processing, payment integration, and administrative features.

During the brainstorming process, the team focuses on generating a wide range of ideas without immediate evaluation, encouraging creativity and innovation. These ideas are then analyzed, discussed, and prioritized based on factors such as feasibility, user value, technical complexity, business impact, and implementation effort. This structured approach helps the team identify the most valuable features, define the project scope, and develop a scalable, user-friendly, and secure e-commerce platform that enhances customer satisfaction and streamlines online shopping experiences.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Template

ShopEZ-Online Shopping Platform

ShopEZ is a full-stack e-commerce platform that enables users to browse products, add items to cart, place orders securely, and track purchases. The platform also provides administrators with tools to manage products, categories, orders, banners, and analytics through an admin dashboard.

 10 minutes to prepare
 1 hour to collaborate
 2-8 people recommended

Before you collaborate

Before starting the development of ShopEZ, the team identified project objectives, selected the technology stack, and assigned responsibilities to team members.

 10 minutes

A

Team gathering

Assign roles such as Frontend Developer, Backend Developer, Database Manager, and Project Coordinator.

B

Set the goal

Develop ShopEZ, a secure e-commerce platform that allows users to browse products, add items to cart, place orders, and track purchases.

C

Learn how to use the facilitation tools

Select the MERN Stack (MongoDB, Express.js, React.js, Node.js) and define the project architecture.

1

Define your problem statement

ShopEZ aims to simplify online shopping by providing a secure platform for browsing products, managing carts, placing orders, and tracking purchases while allowing administrators to efficiently manage products and orders.

 5 minutes

PROBLEM

How might we develop a secure and user-friendly e-commerce platform that simplifies product browsing, purchasing, and order management?

Key rules of brainstorming

To run an smooth and productive session

 Stay in topic.

 Encourage wild ideas.

 Defer judgment.

 Listen to others.

 Go for volume.

 If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm
Generate and collect ideas for features and functionalities required to build the ShopEZ e-commerce platform.

3

Group ideas
Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

- Banner Management

Tip

You can select a sticky note and hit the pencil icon to start drawing.

Tip

Add commentable tags to sticky notes to make it easier to find, browse, organize and categorize important ideas as you move within your board.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.
