Define the Problem Statements

Date	18 June 2026
Project Name	ShopEZ

In today's fast-paced digital marketplace, customers expect online shopping platforms to provide convenience, transparency, and trust. However, many users struggle with inconsistent product information, unclear pricing, and complicated checkout processes. These challenges lead to frustration, abandoned carts, and reduced customer loyalty. Sellers, on the other hand, face difficulties managing orders efficiently and analyzing sales performance due to limited dashboard insights.

ShopEZ aims to bridge this gap by creating a unified, user-friendly e-commerce platform that simplifies product discovery, ensures secure transactions, and empowers sellers with robust analytics. By focusing on intuitive design, seamless navigation, and reliable backend architecture, ShopEZ seeks to deliver a shopping experience that is effortless, transparent, and satisfying for both customers and sellers.
