Student Name	Akshara Cheedalla

Proposed Solution

S.No.	Parameter	Description (ShopEZ)
1	Problem Statement (Problem to be solved)	Existing online shopping platforms often suffer from fake reviews, complicated checkout processes, payment security concerns, poor product discovery, delayed order tracking, and inefficient management of products and orders. Customers require a secure, user-friendly, and reliable platform for seamless online shopping.
2	Idea / Solution Description	ShopEZ is a MERN Stack-based e-commerce platform that enables users to register, browse products, search and filter items, add products to the cart, place secure orders, make online payments, and track their orders. It also provides an admin dashboard to manage products, categories, banners, users, and orders efficiently.
3	Novelty / Uniqueness	• User-friendly and responsive interface. • Secure JWT-based authentication. • Personalized shopping experience. • Real-time order tracking. • Admin analytics dashboard. • Product search, filtering, and category management. • Secure payment and order management.
4	Social Impact / Customer Satisfaction	ShopEZ simplifies online shopping by offering secure transactions, genuine product information, faster checkout, and efficient order tracking. It improves customer satisfaction while helping small businesses and sellers reach more customers through an easy-to-manage online platform.
5	Business Model (Revenue Model)	• Commission on every successful order. • Seller subscription plans. • Featured product advertisements. • Premium product listings. • Promotional banners for brands. • Seasonal marketing campaigns.
6	Scalability of the Solution	The platform is built using the MERN Stack (MongoDB, Express.js, React.js, Node.js), making it highly scalable. New features such as AI-based product recommendations, multiple payment gateways, inventory management, multilingual support, mobile applications, and cloud deployment can be integrated in the future.
